- This application is developed in Android.
- This project we provide accurate confirmed cases,deaths,recoverd cases and other updates related to coronavirus pandemic.
- If any user is interested in the information then using Application.
- For Front end designing we use XML and Material designing.

Project – 2 :

Project Name : College Attendance System:

Technology : Android, Database for SQLITE .

Description :

It's built to be used for school/college faculty so that they may take student attendance on their phones.

- **Student Attendance List Creation:** Once this App is installed on a phone, it allows user to create a student attendance sheet consisting of name, roll number, date, Absent/Present mark and subject. He has to fill student names along with associated roll numbers.
- **Attendance Marking:** The faculty has the list on his phone now. He may see the list call roll numbers and select absent if the student is absent or select present if student is present.
- **Attendance Storage:** This data is now stored in the faculty mobile phone. Faculty may also view it anytime on their phone.
- **Attendance sheet transfer:** The faculty can transfer the file to a server (normal computer) via a bluetooth connection where this data can be stored and maintained by the school or college.

Project – 3 :

Project Name : Training and Placement Cell

Technology : Android, Database for XAMPP SERVER .

Description :"

- As the technology is growing at a faster rate the usage of manual system is reduced. We have planned to develop automation for Training Placement cell. In placement cell the records are maintained in paper format and tedious work to short list the students according to the company requirements. To overcome this problem, records of the students are updated by the authorized administrator. There will be unique user name and password for the administrator.
- The student only view the details of the records. Only the authorized administrator should have the rights to insert, delete and update information into the database and must short list the candidates required for the company.
